# Technological Insight Made Easy

Look for players, trends and hidden connections in millions of Tech blog articles, Industry news pieces, Patents, Government funding projects and Technology offerings. All nicely prepared with PatSnap’s powerful proprietary NLP (Nature Language Processing) technology.

REQUEST DEMO

## Get Instant Knowledge

Search for news, patents, government funding, technology offering and all other sources of information with one click. Use data without the wasting time searching, compiling and cleaning them. We collect all the information you need in a single database and extract key information, such as company, person, technology and investment events for you.

360

## Discover Trends

Look for trends in companies or technologies over time and across different sources. Find industry sweet spots and future super stars.

360

## Spot Hidden Patterns

Explore relations between companies, people, products and technology. Find new technology, new applications, research and investment directions.

360

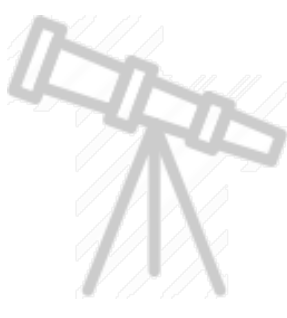

## USE CASES

Investment Study

Market Research

Innovation Ideation

### Crazy Carbon Crystals And More New Ways To Fight Climate Change

Scientists at Oak Ridge National Laboratory have accidentally stumbled upon a way to capture carbon dioxide from the ambient air, creating prism–like crystals and combating global warming in the process.

JAN 10, 2017www.forbes.com

### The James Webb Space Telescope Will Truly Do What Hubble Only Dreamed Of

In 1990, NASA launched the Hubble Space Telescope. This observatory would come to revolutionize not only our scientific understanding of the Universe, but would reveal to humanity, for the first time, what our Universe actually looked like. We could peer inside the densest, most gas–and–dust–rich star forming nebulae, and see exactly how and were stars were beginning to form.

### Massive Windows 10 Upgrade Has A Bigger Omission

In 1990, NASA launched the Hubble Space Telescope. This observatory would come to revolutionize not only our scientific understanding of the Universe, but would reveal to humanity, for the first time, what our Universe actually looked like. We could peer inside the densest, most gas–and–dust–rich star forming nebulae, and see exactly how and were stars were beginning to form.
